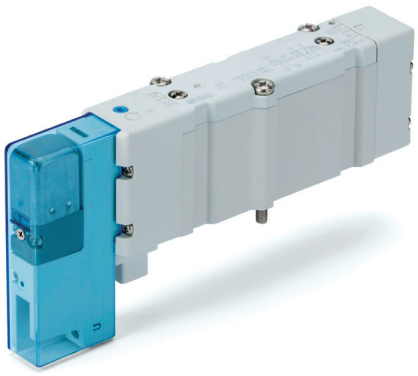
5 port external pilot type solenoid valve with spring return spool

SY-X360 Series

We focus on machinery safety as a key part of our product development strategy. This version will help satisfy your machine safety system requirements.



Main features

Spring return spool - the concept

The SY-X360 versions contain a mechanical spring return spool. In the case of pilot pressure loss, the spool moves to its de-energised position irrespective of the applied electrical control signal. When used as a safety related part of a control system, it thereby satisfies the de-energisation principle.

Validated according to ISO 13849-2

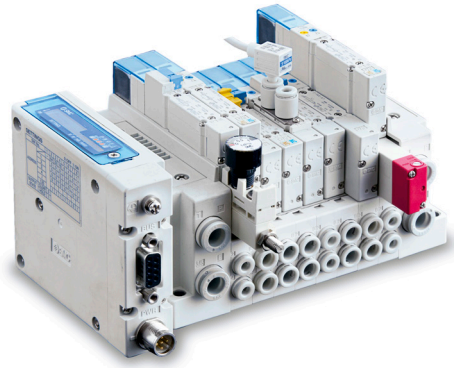
This product is capable of meeting the relevant basic and well-tried safety principles.
Please download our reliability data for the details.

SISTEMA library is available

SY safety-related valves data are additionally integrated into the SISTEMA software tool.
Download the library file from our website and be ready to build your safety function.

SY series valves

Benefit from the high versatility this series gives you and create your own configuration, tailored to your needs.



Applications

Because it has a spring to return the spool, it can be used to implement safety related control systems where the valve spool must always return to the de-energised position on loss of pilot pressure, irrespective of the applied electrical control signal.

Valve specifications

Valve type			Rubber seal
Fluid			Air
External pilot operating pressure range [MPa]	**Operating pressure range**		-100 kPa to 0.7
	Pilot pressure range	**2-position single**	0.35 to 0.7
Ambient and fluid temperature [°C]			-10 to 50 (No freezing)
Max. operating frequency [Hz]			5
Min. operating frequency			1 cycle every 30 days
Manual override			Non-locking push type
Pilot exhaust type			Pilot valve individual exhaust
Lubrication			Not required
Mounting orientation			Unrestricted
Impact/Vibration resistance [1] [m/s²]			150/30
Enclosure			IP67 (Based on IEC60529)
Coil rated voltage [VDC]			24, 12
Allowable voltage fluctuation [V]			±10 % of rated voltage [2]
Power consumption [W]	**Standard**		0.35 (With indicator light: 0.4)
	Quick response type		0.9 (With indicator light: 0.95)
	With power saving circuit		Standard: 0.1 [3] (With indicator light only) [Inrush 0.4, Holding 0.1],
Surge voltage suppressor			Diode (Varistor for non-polar type)
Indicator light			LED

1) Impact resistance: No malfunction occurred when it is tested in the axial direction and at the right angles to the main valve and armature in both energised and de-energised states every time in each condition. (Values at the initial period)
Vibration resistance: No malfunction occurred in a one-sweep test between 45 and 2000 Hz. Test was performed at both energised and de-energised states in the axial direction and at right angles to the main valve and armature. (Values at the initial period)

2) Due to voltage drops by the internal circuit in S/Z type and T type (with power saving circuit), use within the allowable voltage fluctuation as follows.

S/Z type { 24 VDC: -7 % to +10 %
12 VDC: -4 % to +10 %

T type { 24 VDC: -8 % to +10 %
12 VDC: -6 % to +10 %
